

Assignment 2

Due: Saturday, October 3, by 8:00PM

Problem: You flip a coin 6 times and obtain:

Heads, Heads, Heads, Tails, Tails, Heads.

Perform a hypothesis test to decide if this is a fair coin or not. Use the following two hypotheses:

- H_0 : fair coin with certain heads probability $\theta = 1/2$
- H_A : unfair coin with uncertain heads probability $\theta \in [0, 1]$
